

THE PUCEST PIPE SYSTEM

- Short downtime
- Good abrasion resistance
- Very good noise damping
- High elasticity
- Easy mounting
- Problem-free material flow
- Customized production
- UV resistant
- Resistance to oil and grease
- High impact strength
- Can be repaired at any time with PUCEST Tix
- Very good sliding properties
- Very good weather resistance
(does not become porous)

Special designs are possible!

The pipe system consists of individual segments that can be installed quickly, professionally, and tightly closed. The inner diameter at the narrowest point is 250 mm.

The nesting of the segments allows the material to pass through without any problems!
